DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 2, 2008 has been entered.

Claim Rejections - 35 USC § 103

2. Claims 9-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Templeton, US 5,679,940 in view of Norton, US 6,243,689.

Templeton discloses, e.g. Fig. 1, a method of using a computer, e.g. 35, for determining whether to collect from check writers using data comprising a negative file 85, a positive file 87, a modeling system, e.g. 90, a merchant file 100, and a credit risk scoring algorithm, e.g. cols. 12-14. Templeton does not show a database using categories to remove negative information from the negative file or to remove the negative information.

Norton discloses, e.g. Figs. 1-7 and related text, a check verification system/method where a modified negative file, e.g. 84, is sent to a merchant location for check verification.

To have provided a modified negative file sent to a merchant location for check verification for Templeton, would have been obvious to one of ordinary skill in the art in view of Norton. The motivation for such would have been to have provided a more secure payment processing system/method for Templeton.
